- Federal Capital Territory, Nigeria

Enthusiastic and dedicated Software Engineering student at Nile University of Nigeria with a passion for software development and a proven ability to learn new technologies quickly. Seeking an internship or entry-level position to gain practical experience and contribute to a dynamic team.

## Education

---

**Nile University of Nigeria**, Abuja, Nigeria

- Bachelor of Science in Software Engineering (Expected Graduation: October 2027)
- GPA: 4.39
- Relevant Coursework: Digital Logic and Design, Computer Programming, Green Technology, Web Development, etc.
- Projects: Developed a student database management system using Python. Built an automated dustbin AI agent using an Arduino chip

## Experiences

---

- Arduino & Robotics Bootcamp, September 2024: Programmed and maintained Arduino kits to perform various tasks. One task I worked on was creating an automated trash can using an Arduino board.
- BCG Climate & Sustainability Job Simulation on Forage - March 2025: Completed a carbon emissions analysis simulation for the Sustainability Team, using Excel to calculate baselines and comparing data from the CDP database for accuracy. Analyzed and recommended carbon reduction initiatives for Fast Cars to achieve Net Zero, considering effective Scope 3 strategies. Crafted clear emails and a presentation to communicate findings and recommendations to the client. Adapted messaging strategies to address investor concerns, aligning with Fast Cars' sustainability goals.

## Volunteers

---

- |                                      |          |
